Dear Sir,

Christofer enclosed you will find a letter that brings a smile to me and I am certain it will do the same for you. Let me first say good job and continue your efforts. I will allow the enclosed letter to speak for me. I also applaud you and Applied Bolting Technology.

I look forward to seeing you at USD.

Sincerely,

Dear Sir and Brother:

My name is Harvey C. Swift. I am an Ironworker with Local 584, Tulsa, Oklahoma. I have been an Instructor in our Apprentice Program since 1998. This year will be the 3<sup>rd</sup> time for me to attend the Instructor's Conference at USD.

I wanted to take a moment of your time to applaud the vendors who attend the training course, in particular Applied Bolting and most specifically their representative, Christofer Curven.

I am currently the Ironworker Superintendent on a project at the Sinclair Refinery in Tulsa. We are erecting the structural steel for a catalyst recirculation unit. The designer and engineer is U.O.P. out of Chicago.

Chris, with Applied Bolting, has spent hours on the phone with me, not to mention the emails, research, faxes and other venues answering questions that the project has raised. He has been very accommodating and an enormous asset to me. The QC/QA men for both Sinclair and U.O.P. have been very impressed by the Ironworkers ability to supply them with accurate information and our ability to resolve problems both effectively and efficiently. A great part of our ability to do so has been due to Chris's willingness to provide assistance.

I wanted you to know how thankful I am, not only for the teaching skills and knowledge that I bring back to our JATC from USD, but also for the knowledgeable connections I gain as a result of meeting the vendors and learning what products they have to offer.

Please share this with Applied Bolting and also let all of the other vendors know that their work is greatly appreciated.

Fraternally,

Harvey C. Swift
