Questions about Installation or Inspection?

Call us at (802) 460-3100

Pro Tips (read first)

- Store all hardware to prevent corrosion, reducing the effort needed to tension the bolts.
- Lubricate both the bolt threads and washer face of nuts to reduce friction and improve the installation.
- Use a tool with enough power, hardware testing can check this.
- Hole detail in the steelwork is critical for proper assembly.
- Videos, tips and specific instructions are available at appliedbolting.com.

Scan for support

The diagram shows a top-down view of the DTI tool with five orange bumps labeled 1 through 5. A grey box contains the instruction: 'When orange is visible from all bumps, installation and inspection is complete.' To the right, a box provides contact information for questions, including the phone number (802) 460-3100 and the email address info@appliedbolting.com. Further right, a box titled 'Videos and Tips' contains a QR code and the text 'Scan for support'.
